

Universal Prekindergarten in California

The Accelerated Schools intent is to apply for the Universal Prekindergarten Grant in California to service all 4 year old children who are selected through the lottery. Decades of research demonstrate that an early and strong foundation for learning matters. Children who have effective learning opportunities before kindergarten have an advantage in school and in life over children who do not, especially children with adverse childhood experiences. Children who attend quality preschool programs are more prepared for school in terms of their early literacy, language, and math skills, their executive function, and social emotional development. In some cases, preschool participants are less likely to be identified for special education services or to be held back in elementary school than children who do not attend developmentally-informed preschool programs that include strong educational components.

California is poised to realize universal prekindergarten (UPK) for all four-year-old children, and to expand services for three-year-old children through bold leadership and the unprecedented investments in the Budget Act of 2021, including universal transitional kindergarten (UTK) and expansion of the California State Preschool Program (CSPP).

The tumult of the COVID-19 pandemic accelerated a call to action to ensure a strong educational foundation for all children, emphasizing the critical role of our education system in supporting children and families' needs and how local flexibility fuels community capacity to meet their needs. California's leaders responded with historic investments in family support, child development and care, and education. Yet, as the Master Plan for Early Learning and Care highlights, realizing the promise of early childhood investments will require all partners—across early learning and care, early education, elementary education, and expanded learning and extended care communities—to work together to create a stronger system designed to meet the needs of the whole child.
